## **Abstracts**

Global Recyclable Thermal Insulation Packs Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Recyclable Thermal Insulation Packs consists of most common types of materials used for packaging which include cellulose, fiberglass, and mineral wool. All these materials are produced using recycled waste materials. Growing FMCG industry and rising adoption of recyclable packaging are key drivers for the growth of Recyclable Thermal Insulation Packs market. According to the United Nations Environment Programme (UNEP) In the year 2020 Swiss based food company Nestl?'s 88 % packaging, by weight, was reusable or recyclable and the company is planning to make all its plastic packaging 100 per cent recyclable or reusable by 2025. Also, as of year 2020 US based McDonald's 80 % packaging was recyclable and the company will make all its packaging from renewable and recyclable sources by 2025. Also, with the increasing demand from pharmaceutical and cosmetics industries, and recent surge in vaccine transportation due to covid 19 pandemic the adoption & demand for Recyclable Thermal Insulation Packs is likely to increase the market growth during the forecast period. However, high cost of Recyclable Thermal Insulation Packs and slow adoption rate among industry players impede the growth of the market over the forecast period of 2021-2027.

The key regions considered for the global Recyclable Thermal Insulation Packs market study includes Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to increasing e-commerce industry and well-established packed food market in the region. Whereas, Asia-Pacific is anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such increasing food and beverage and pharmaceutical sectors in countries such as China, and India would fuel up growth prospects for the Recyclable Thermal Insulation Packs market across Asia-Pacific region.
