Abstracts

Global Rescue Hoist System Market is valued at approximately USD 1753.11 million in 2021 and is anticipated to grow with a healthy growth rate of more than 7 % over the forecast period 2022-2028. Hoist Rescue system is an emergency rescue tool that can be used to quickly rescue or retrieve people from dangerous or isolated locations. A hoist is a device for lifting and moving materials, a drum (or wheel) on which a rope (wire or fibre) or a chain is wrapped provides the lifting force. Rise in demand for the Rescue Hoist System, rising use of better technological components and rise in the occurrence of Natural Disasters has driven the adoption of Rescue Hoist Systems across the projected period. For Instance: In 2021, there were a total of 401 natural disaster events worldwide. The Asia Pacific region experienced the highest number of natural disasters, most likely due to its size and susceptibility. Also, the implementation of strict regulatory guidelines and rise in demand from End-Users is most likely to boost the overall growth of the Rescue Hoist System Market. However, extended product shelf life can obstruct the Market's expansion over the projection period of 2022-2028.

The key regions considered for the Global Rescue Hoist System Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading region across the world. Substantial increase in usage of new and advanced technologies during disasters and crises is driving the Market growth in Europe. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. The Market is expected to grow during the projected period, due to the rising government investments.
