Abstracts

Global Residential Outdoor Storage Market is valued approximately USD 1.52 billion in 2022 and is anticipated to grow with a healthy growth rate of more than 4% over the forecast period 2023-2030. Residential outdoor storage refers to the practice of storing various items or belongings outside the main living space of a residential property. It typically involves utilizing outdoor spaces such as yards, gardens, or patios to store items that may not fit or be suitable for indoor storage. The Residential Outdoor Storage market is expanding because of factors such as expeditious urban development and increasing demand of outdoor furniture's. They can be used to store items like outdoor toys, sports equipment, patio cushions, or pool supplies. Outdoor cabinets and boxes are designed to keep these items secure and protected from moisture and weather conditions. Its importance has progressively increased during the forecast period 2023-2030.

In urban areas, balconies and patios serve as the primary outdoor spaces for residents. According to the Statista, the global urbanization rate was 57 percent in 2022. North America has the highest amount of urbanization, with nearly four fifths of the population living in cities. Furthermore, in 2021, in India, urbanization rate has increased by more than 4% in the last decade, which indicates that people have moved away from rural areas for a better way of life in cities. Another important factor drives the Residential

Outdoor Storage market is increasing demand of furniture's. Outdoor storage furniture plays a crucial role in helping maintain a tidy and organized outdoor space for relaxation and entertainment purposes. In addition, as per Statista, in 2020, the global outdoor furniture market was valued at approximately USD 17.1 billion and projected to reach up to USD 22.9 billion by 2027. Moreover, increased proliferation of e-commerce platforms and rising number of residential buildings is anticipated to create a lucrative growth opportunity for the market over the forecast period. However, preference for indoor storage due to changing climate conditions and limited availability of land or space stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Residential Outdoor Storage Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to increasing number of residential buildings and rising trend of constructing patios outside residential premises in the region. Furthermore, Europe is expected to grow significantly during the forecast period, owing to factors such as growing number of new residential construction activities and ongoing renovations of existing residential premises in the region.
