## **Abstracts**

Global Risk Management Market valued approximately USD 13.12 billion in 2018 is anticipated to grow with a healthy growth rate of more than 9.20% over the forecast period 2019-2026. The Risk Management Market is continuously growing in the global scenario at significant pace. Risk management helps in analyzing, evaluating and managing the various financial risk related to the business such as, operational risk, credit risk and market risk, foreign exchange risk, shape risk, volatility risk, liquidity risk, inflation risk, business risk, legal risk, reputational risk, sector risk etc. This include the source, measurement of risk exposure and plans to mitigate the risk. Risk management software helps in making dividend announcements and financial statements relevant and reliable. It provides various solution for risk mitigation. It predicts credit risks more accurately which is equal to better business decisions. It also helps in getting data in real time to mitigate losses due to fraud and breaches. Rise in ICT expenditure by governments and increase in measures of enterprises performance management are the substantial driving factors of the market during the forecast period. Additionally, increasing need for risk management across various industrial segments, the advent of financial technologies and the continuous changes in corporate and government regulations are another factor that impelling the demand of risk management across the globe. Moreover, increasing internet penetration across the developing region and increasing Artificial Intelligence (AI)-enabled risk management software solutions is the factors that likely to create numerous opportunity in the near future. However, security

concerns over cloud deployment and lack of awareness among organizations are the factors that limiting the growth of the market during the forecast period.

The regional analysis of Global Risk Management Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share due to rising adoption of risk management software models, because of its early implementation in a majority of the verticals in the region.
