## **Abstracts**

Global Robotaxi Market is valued at approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% during the forecast period 2023-2030. Robotaxi is a fully autonomous or self-driving taxi service where vehicles operate without a human driver. These vehicles are equipped with advanced sensors, cameras, radar, lidar, and artificial intelligence to navigate and make decisions about driving, without the need for human intervention. The key factors driving the market growth are the growing acceptance and popularity of ride-sharing services, the cost efficiency of autonomous taxi services, and the growing adoption of autonomous vehicles that are anticipated to support the market growth during the forecast period 2023-2030.

Additionally, the growing adoption of autonomous vehicles plays a crucial role in supporting the growth of the Robotaxi Market. As autonomous vehicle technology matures, it becomes more reliable and safer. This maturation process builds trust among consumers and regulators, facilitating the acceptance of autonomous vehicles for use in services such as Robotaxis. According to Statista, the number of autonomous cars in 2019 was 31.4 million units; in 2022, the number reached 43.57 million units, and it is anticipated to reach 54.2 million by 2024. As a result, the rising demand for autonomous vehicles is anticipated to create a lucrative demand for the market. Moreover, growing advancements in autonomous technology, and the development of smart cities are anticipated to create lucrative opportunities for the market. However, the high R&D cost for implementation and cybersecurity threats stifles market growth

throughout the forecast period of 2023-2030.

The key regions considered for the Global Robotaxi Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the continuous advancements in sensor technology, Favorable regulatory environments and supportive policies, and public and private sectors investing heavily in research and development, infrastructure, and pilot programs to support the growth of autonomous vehicle technologies, including Robotaxis. Whereas, the Asia Pacific is expected to grow with the fastest growth rate over the forecast period, owing to factors such as rapid urbanization, supportive government regulations, and growing investment in smart city projects.
