Abstracts

Global Roofing System Market is valued at approximately USD 127.75 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 3.09% over the forecast period 2022-2029. The roofing system generally refers to the roof insulation (if present), air barrier or vapor retarder (if produce), the roof membrane, and accessories. The roofing products offer more security from rain, heat, and other atmospheric circumstances. All the roofing products are mainly used for the construction of roofs in residential and commercial buildings, such as offices, hotels, and educational institutes. The growing government initiatives to provide affordable housing, rebound in non-residential construction, and development of economic zones in developing countries such as China & India are the few factors responsible for the market growth across the globe.

The exponential rise in construction and infrastructure activities is playing a significant role that is impelling the market demand in the global market. For instance, as per the Statista report, in 2021, the global construction market was estimated valued at around USD 7.3 trillion. Also, it is anticipated to grow and reach nearly USD 14.4 trillion by 2030. Similarly, International Construction Market Survey estimates that the global growth rate of the construction sector was approximately 3.5% in 2017 and increased to 3.9% (nearly) in 2018. Thus, these aforementioned factors are fostering the demand for roofing system globally. Moreover, the rise in population and urbanization along with the growing demand for sustainable roofing materials are the major factors likely to create lucrative growth opportunities to the market in the upcoming years. However, the high

costs of raw materials and installation are one of the major factors that restrain the growth of the global Roofing System market during the forecast period.

The key regions considered for the Global Roofing System Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the increased demand for sustainable roofing products from the residential sector, widely developed manufacturing industry, and government initiatives to develop social infrastructure in the region. However, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2029. Factors such as the enforcement of green building codes by various governments along with the growing construction industry across the region would create the demand for roofing systems in the Asia-Pacific region.
