## **Abstracts**

Global Roofing System Market is valued approximately at USD 115 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 4.3% over the forecast period 2019-2026. The term “roofing system” refers to the roof insulation (if present), air barrier or vapor retarder (if produce), the roof membrane, and accessories. The roofing products offer more security from rain, heat and other atmospheric circumstances. All the roofing products are mainly used for the construction of roofs in residential and commercial buildings, such as offices, hotels, and educational institutes. Rise in construction and infrastructure activities, growing government initiatives to provide affordable housing, and development of economic zones in developing countries such as China & India are the few factor responsible for high CAGR of the market over the forecast period. For instance, according to International Construction Market Survey, the growth rate of construction industry globally in 2017 was estimated nearly 3.5% and it grew to 3.9% (approx.) in 2018. Similarly, as per the European Construction Industry Federation (FIEC), it is clearly stated that construction activity in entire Europe grew by 3% in 2018 compared to 2017. Moreover, rise in population and urbanization along with growing demand for sustainable roofing materials are the major factors likely to create lucrative growth opportunity to the market in the upcoming years. However, high costs of raw materials and installation is one of the major factor that restrains the growth of global Roofing System market during the forecast period.

The regional analysis of global Roofing System Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World.

North America is the leading/significant region across the world in terms of market share owing to the increased demand of sustainable roofing products from the residential sector, widely developed manufacturing industry, and government initiatives to develop social infrastructure in the region. However, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026. Factors such as enforcement of green building codes by various governments along with growing construction industry across the region would create the demand for roofing system in the Asia-Pacific region.
