## **Abstracts**

Global Rose Oil Market is valued approximately USD 316.52 million in 2020 and is anticipated to grow with a healthy growth rate of more than 6.57 % over the forecast period 2021-2027. Rose oil is a kind of essential oil that is extracted from rose petals using methods such as solvent extraction, steam distillation, and supercritical carbon dioxide extraction. A significant driver projected to fuel growth of the worldwide rose oil market is the increasing usage of rose oil in different end-use sectors such as perfume, cosmetics, personal care products, pharmaceuticals, and aromatherapy. The rising awareness about the benefits of organic ingredients in essential oils has driven the market for rose oil. For instance: Organic product sales climbed from 50.1 million in 2019 to 55.1 million in 2020, according to a survey by the Organic Trade Association (OTA). India's expected production of essential oils is \$4 billion, according to a research by the Fragrance and Flavor Department Center. However, high cost of organic products and cultivation of several species of rose producing oil hampers the growth of the market over the forecast period of 2021-2027. Also, rising R&D initiatives and increasing trends of organic lifestyle is likely to influence the market growth during the forecast period.

The geographical analysis of the global Rose Oil market includes Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Europe is the most dominating region across the world in terms of market share due to the growing demand for natural products and oils as well as presence of leading cosmetic manufactures. Whereas, Asia-Pacific is also expected to show the highest growth rate over the forecast period 2021-2027. Factors such as rising demand of pharmaceuticals and herbal products leading to the increased demand of rose oil across Asia-Pacific region.
