## **Abstracts**

Global Rotary Indexer Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Rotary Indexer can be defined as specialized tool utilized to convey and position components during the manufacturing process. The indexing unit rotates items to a specific position. These indexers are also used to place objects at exact points around a workstation. Rotary indexers are widely used across different industries such as automotive, electronics, medical & healthcare, and pharmaceuticals among others. The rising automotive manufacturing sector and increasing number of end use applications as well as recent product launches from leading market players are factors that are accelerating the global market demand. For instance, according to Statista – in 2021, the global automotive manufacturing market was valued at USD 2700 billion, and it is projected to grow to USD 2800 billion by end of 2022. Furthermore, leading market players are working towards product launches to leverage the growing demand for rotary indexer. For instance, in April 2022, UK based Rotary precision instruments Ltd. Launched its new TruMotion rotary table. This new product would be ideal for round parts, with dimensions of up to 400mm x 220mm high weighing up to 50kg. Also, growing spending towards industrial automation coupled with rising medical

& healthcare sector in emerging economies are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, a high installation and maintenance cost associated with rotary indexer impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Rotary Indexer Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to the growing automation across different industries and presence of leading market players in the region. Whereas, Asia Pacific is anticipated to exhibit a significant growth rate over the forecast period 2022-2028. Factors such as the thriving growth of automotive manufacturing industry and increasing penetration of leading market players in the region, would create lucrative growth prospects for the global Rotary Indexer Market across the Asia Pacific region.
