Abstracts

Global Safes and Vaults Market is valued approximately USD 5.82 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 8.1 % over the forecast period 2020-2027. Safes and Vaults are secure storage systems to protect valuable items, such as money, documents, records, and others from unauthorized use, theft, natural disasters, fire, etc. They are metal boxes made up of metals.,. These safes and vaults are secured through passcodes, numerical pins, or passwords. The major drivers are issues related to the security of valuable physical assets, increasing threat levels, expansion of retail and business banks, and awareness for security. Further, rapidly evolving infrastructure safety structure, increased application areas, increasing demand for technologically advanced products that are integrated with alarms, video monitoring systems, seismic detectors, finger-print scanners and auto-locking mechanisms has led the adoption of Safes and Vaults across the forecast period. For Instance: n April 2019, Diebold Nixdorf collaborated with KeyBank, a regional bank headquartered in Cleveland, Ohio, the U.S. for bringing digital advancement in their financial security products. However, increasing digital transaction solutions impedes the growth of the market over the forecast period of 2020-2027. Also, with the growth of smart cities, new technological developments in the safe and vaults industry and increasing cyber-attack rate, the adoption & demand for Safes and Vaults is likely to increase.

The regional analysis of global Safes and Vaults market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of

market share owing to rising number of retail outlets, public awareness about security products coupled with the well-established technological infrastructure. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rising disposable income, increased cash management safes, investments in technological advancements and rise in theft & natural disasters would create lucrative growth prospects for the Safes and Vaults market across Asia-Pacific region.
