Global Sandblasting Machines Market is valued at approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2023-2030. Sandblasting, also known as abrasive blasting, is a process that involves forcibly propelling abrasive materials, such as sand or grit, against a surface to remove contaminants, smooth rough surfaces, or create a desired texture. The major driving factors for the Global Sandblasting Machines Market are the rising automotive industry and the rising marine and metal working industry. Moreover, industrial growth and infrastructure development and technological advancements are creating lucrative growth opportunities for the market over the forecast period 2023-2030.

Sandblasting machines are commonly used in the automotive manufacturing process for surface preparation. They are utilized to remove rust, paint, coatings, and other contaminants from car bodies and automotive parts before painting, welding, or further processing. Proper surface preparation is crucial to ensuring the quality and longevity of the final product. According to the German Association of the Automotive Industry (VDA), the production of passenger cars in Germany reached 3.5 million units in 2020, which was a decrease of around 25% compared to the previous year due to the impact of the COVID-19 pandemic. However, the German automotive industry is expected to recover in the coming years and return to its pre-pandemic production levels. Along with

this, in 2020, the UK government launched various initiatives to support the adoption of automation technologies in the country. For example, the Made Smarter initiative initiated in year 2023, aims to support the development and adoption of advanced digital technologies, including automation and robotics, in UK manufacturing. The government has also launched a Digital Manufacturing on a Shoestring initiative, which aims to help small and medium-sized manufacturers adopt digital technologies at an affordable cost. However, the high cost of Sandblasting Machines stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Sandblasting Machines Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the presence of key industries such as automotive, aerospace, and construction.
