## **Abstracts**

Global Sanitary Pumps and Valves Market is valued approximately USD 1.9 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 4.3% over the forecast period 2021-2027.

Sanitary pumps are specialized equipment that is used to pump slurries and hygienic liquids with the help of the industrial processing pipeline systems, and valves on a pump control the flow of liquid through a pump. These are the critical mediator in the distribution of the product, which is intended for human consumption or contact, like dairy products, food, cosmetics, pharmaceuticals, food additives, beverages, fine chemicals, and many others. The implementation of mandatory government norms for maintaining optimal hygiene levels, rising preference for plant automation by the manufacturers, along the introduction of innovative products are accelerating the market demand in the approaching years. For instance, In June 2021, ALFA LAVAL introduced a Circumferential Piston Pump named an ALFA LAVAL DuraCirc pump. This is an innovative pump with a novel design, offers high-performance hygiene safety, presenting supreme customer value, and easy maintenance. However, growing competition from unorganized sector and gray market players impedes the growth of the

market over the forecast period of 2021-2027. Also, the adoption of the IIoT and Industry 4.0 across the industrial plants is anticipated to act as a catalyzing factor for the market demand during the forecast period.

The key regions considered for the global Sanitary Pumps and Valves market study includes Asia Pacific, North America, Europe, Latin America and the Rest of the World. Europe is the leading region across the world in terms of market share owing to growing needs for sanitary equipment in end-use industries like dairy, pharmaceuticals, processed food & beverages in major countries such as the UK, Germany, and France. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR over the forecast period 2021-2027. Factors such as growing population in emerging economies, rapid urbanization, and rising industrialization, along with increasing per capita income would create lucrative growth prospects for the Sanitary Pumps and Valves market across the Asia-Pacific region.
