Global Screw Compressor Market is valued at approximately USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% during the forecast period 2023-2030. Screw compressor is a type of positive displacement compressor that uses two intermeshing helical rotors, often referred to as screws, to compress air or gas. As the rotors rotate, they trap and compress the air or gas between them and reducing the volume and increasing the pressure. Screw compressors are widely used in various industrial applications due to their efficiency, reliability, and versatility. The key factors driving the market growth are industrial automation and manufacturing growth, rise in energy consumption, and increasing demand for energy-efficient compressors that are anticipated to support the market growth.

Additionally, the growing energy consumption contributes to the demand for screw compressors. As industries expand and manufacturing processes become more sophisticated, the demand for compressed air in various industrial applications increases. Screw compressors are widely used in industries such as manufacturing, automotive, electronics, and others, where compressed air is a vital utility for powering tools, machinery, and automation systems. According to Statista, in 2020, the primary energy consumption worldwide was 566.49 exajoules and in 2022 the energy

consumption reached 604.04 exajoules. As a result, the growing energy consumption is anticipated to support the market growth. Moreover, increasing demand for the environment-friendly screw compressors, and industrialization in emerging economies increase demand for screw compressors which are anticipated to create lucrative opportunities for the market during the forecast period 2023-2030. However, the high installation cost and new technology stifle market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Screw Compressor Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 owing to the growing emphasis on energy efficiency and sustainability, the rising oil and gas industry, and the growing focus on oil-free compressors. Whereas, the Asia Pacific is expected to grow with the highest CAGR over the forecast period, owing to factors such as the growing infrastructure development projects, expansion in oil and gas activities, and growth in chemical and petrochemical industries.
