Abstracts

Global Sectional Doors Market is valued approximately USD 5.9 billion in 2023 and is anticipated to grow with a healthy growth rate of more than 4.90% over the forecast period 2024-2032. Sectional doors are a type of overhead garage door commonly used in commercial and industrial setting. Sectional doors are divided into horizontal sections that slide upward along tracks when opened. These sections are typically constructed from steel, aluminum, or other durable materials and are connected by hinges, allowing for smooth operation and efficient use of space. sectional doors can be equipped with various features such as remote-controlled operation, insulation, windows, and safety sensors, enhancing their functionality and convenience. Furthermore, the integration of smart technologies, such as IoT connectivity, remote monitoring, and smartphone-controlled operation, is becoming more prevalent in sectional doors in the Global Sectional Doors Market. These features offer added convenience, security, and control for users, driving the adoption of smart sectional doors across residential, commercial, and industrial sectors.

The Global Sectional Doors Market is driven by rapid urbanization and industrialization, particularly in emerging economies, are fueling the demand for sectional doors in residential, commercial, and industrial construction projects. The expansion of infrastructure, including residential buildings, commercial complexes, warehouses, and distribution centers, necessitates the installation of reliable and efficient door systems to ensure convenient access and security. In addition, the increasing adoption of sectional doors in the logistics and transportation sector, driven by the growth of e-commerce and

the need for efficient distribution and warehousing facilities, is contributing to market expansion. Sectional doors offer advantages such as quick opening and closing speeds, space-saving design, and customizable options, making them ideal for high-traffic areas such as loading docks, truck bays, and distribution centers. However, high cost of purchasing and installing sectional doors and availability of alternative door types is going to impede the overall demand for the market during the forecast period 2024-2032.

The key regions considered for the Global Sectional Doors market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. In 2023, Europe was the largest regional market in terms of revenue. rapid urbanization and infrastructure development across European countries are fueling the demand for sectional doors in residential, commercial, and industrial construction projects. The expansion of residential complexes, commercial buildings, warehouses, and logistics centers necessitates the installation of reliable and efficient door systems to ensure convenient access, security, and functionality. Growing emphasis on energy efficiency and sustainability in building design and construction practices, is further driving the adoption of energy-efficient sectional doors with enhanced insulation properties. These doors help minimize heat loss or gain, reduce energy consumption for heating and cooling, and contribute to green building initiatives, making them increasingly attractive to environmentally conscious consumers and businesses across the region. Furthermore, the market in Asia Pacific, on the other hand, is expected to develop at the fastest rate over the forecast period 2024-2032.

Major market player included in this report are:

B&D Australia Pty Ltd.
ASSA ABLOY Group (Amarr)
Steel-Line Garage Doors
Hormann Group
Raynor Garage Doors
Megadoors
Avians Innovations Technology Pvt. Ltd.
Shanghai Kenvo Door Co.,Ltd
Sanwa Holdings Corporation (Novoferm Group)
RJ Garage Doors
