## Abstracts

Global Secure Access Service Edge Market is valued at approximately USD 0.67 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 36.4% over the forecast period 2021-2027. Managing and securing different networks and data access points in enterprises is a difficult task. And growing adoption of BYOD is further complicating it. Secure access service edge (SASE) is used to unify such networks into a single platform, thus making access easier. The market is being driven by growing popularity of remote working and rising adoption of cloud-based IT systems. Also, various network security vendors are adding SASE functionalities to their portfolio to expand their customer base. For instance, In July 2020, Fortinet acquired a networking and cloud security provider named OPAQ Networks. This acquisition led to the integration of OPAQ Networks' ZTNA solution to Fortinet's Security Fabric, thus enhancing its SASE security platform. Such strategic acquisitions and initiatives are expected to propel the market forward in coming years. However, lack of in-depth expertise may hamper the market growth over the forecast period.

Geographically, North America is dominating the global Secure Access Service Edge Market owing to the continues technological advancements, growing adoption of cloud services and rising expenditure on IT infrastructure. Furthermore, Asia Pacific is expected to register the highest CAGR from 2021 to 2027 attributable to the growing expenditure on IT security and rising adoption of BYOD policies in the region.
