Abstracts

Global Self-Cleaning Glass Market to reach USD 134.7 million by 2025.

Global Self-Cleaning Glass Market valued approximately USD 94 million in 2017 is anticipated to grow with a healthy growth rate of more than 4.60% over the forecast period 2017-2025. The growth of the construction industry is the major factor driving the self-cleaning glass market. The low lifetime-cost of self-cleaning glass is another factor fueling the growth of this market; the cost-cutting on labor and detergent otherwise required to wash the glass reduces the lifetime-cost of self-cleaning glass. The growing demand for self-cleaning glass for use on solar panels offers an opportunity for the growth of the self-cleaning glass market. The rising demand for eco-friendly glass products is another opportunity for the self-cleaning glass market. On the other hand, the low effectiveness of self-cleaning glass in areas with low rainfall and less sun exposure is a major factor restraining the market.

The regional analysis of Global Self-Cleaning Glass Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. The Asia Pacific is expected to be the fastest-growing market for self-cleaning glass during the forecast period. The growing middle-class populations with high disposable incomes and increasing demand for sustainable construction are major factors contributing to the growth of the self-cleaning glass market in this region.
