Abstracts

Global Shoe Insoles Market is valued at approximately USD 5.38 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.6% over the forecast period 2022-2028.

The Shoe Insoles are inside of the soles that are worn and torn in the long run. Thus, rising demand for cost-effective and non-invasive foot treatment and increasing prevalence of sports injuries are factors contributing to the market growth. For instance: according to Insurance Information Institute, basketball injuries were 214,847 units, football injuries were 122,181 units, soccer injuries were 81,452 units in the USA. However, variations in the raw-material prices impede the growth of the market over the forecast period of 2022-2028. Also, rising growth of the footwear industry and innovations in the products are likely to increase the growth of the market in the forecasting period.

The regional analysis of global Shoe Insoles market includes Asia Pacific, North America, Europe, Latin America and Rest of the World for analysis and estimation. Asia Pacific is the leading region across the world in terms of market share owing to changing lifestyles. Whereas, North America is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Increasing back pain and joint pain would create lucrative growth prospects for the Shoe Insoles market across North American region.
