## Abstracts

Global Silicon Battery Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Lithium–Silicon Battery is a name used for a subclass of lithium-ion battery technology that employs a silicon-based anode and lithium ions as the charge carriers. The rising electronic industry and high energy density compared to other battery chemistries have led to the adoption of Silicon Battery across the forecast period. For Instance: As per the IBEF, The Indian electronics manufacturing industry is projected to reach US\$ 520 billion by 2025. In September and October 2021, exports of electronic goods stood at US\$ 1.17 billion and US\$ 1.35 billion, respectively. In FY22 (until October 2021), imports of electronics goods stood at US\$ 28.59 billion, whereas exports stood at US\$ 7.89 billion. Also, with the need for high-performance batteries in energy storage applications, the adoption & demand for Silicon Battery is likely to increase the market growth during the forecast period. However, volumetric expansion of silicon when lithium is inserted in batteries impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Silicon Battery Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the increasing R&D activities on new battery technologies. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as demand in automotive, consumer electronics, and renewable energy industries would

create lucrative growth prospects for the Silicon Battery Market across Asia-Pacific region.
