Global Silicon Tetrachloride Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Silicon Tetrachloride refers to a colorless fuming corrosive liquid (SiCl_4). It is made by heating silicon or silicon carbide with chlorine. Silicon Tetrachloride is used to produce high purity silicon and silica for commercial applications such as manufacturing of optical fiber network and semiconductors among others. Growing Optical fiber industry and rising penetration of electronic gadgets such as smartphones, Tablets etc. are key drivers for the growth of Silicon Tetrachloride market. For instance, according to global database management company Statista- in 2020, the global specialty optical fibers market generated revenue of USD 18.3 billion and as per projections by the year 2025 the market is estimated to generate revenue of around USD 42.1 billion. Also, as per India Brand Equity Forum (IBEF)- the total wireless or mobile telephone subscriber base reached 1.16 billion in September 2021, from 1.148 billion in September 2020. Also, with the increasing demand from semiconductor industry and rising electronics sector in emerging economies, the adoption & demand for Silicon Tetrachloride is likely to increase the market growth during the forecast period. However, high manufacturing cost of Silicon Tetrachloride and limited availability of raw material impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Silicon Tetrachloride Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North
