Abstracts

Global Silver Salt Market is valued approximately USD 0.97 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 7.9 % over the forecast period 2022-2029. Silver Salt is a chemical compound obtained through chemical reaction of halogens with silver at high temperature. Some of the widely used silver salts are silver chloride (AgCl), silver bromide (AgBr), silver iodide (AgI) and silver fluoride (AgF). These salts are utilized across different industries such as medical industry, water treatment industry and electronics industry among others. The increasing expansion of water wastewater treatment sector and growing industrial application of silver salt as well as strategic initiatives from leading market players are key factors accelerating the market growth during the forecast period.

According to Statista – as of 2021, the global water and wastewater treatment market was valued at USD 281.75 billion. Furthermore, the market is projected to grow to USD 490 billion by 2029. Also, rising demand from electronics sector and growing industrialization in emerging economies would create lucrative growth prospectus for the market over the forecast period. However, high Cost associated with Silver Salt and health concerns associated with Silver Compound impede the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Silver Salt Market study includes Asia
