Global Simethicone Market is valued approximately at USD XX billion in 2019 and is anticipated to grow with a growth rate of more than XX % over the forecast period 2020-2027. Simethicone is an orally administered drug anti-foaming agent utilized to minimize bloating, diarrhea, pain or discomfort which is caused by excessive gas mainly swallowed air with other gases in stomach and intestine. Simethicone ensures the gas bubbles in the stomach to come together so that the passage is created easily to release gas. Simethicone is apt for all age groups including babies, adults and elderly people. Due to adaptation of unhealthy lifestyle, there is an increase in stomach and intestine problems this is a major driver for the growth of the market. Stomach problems are also caused because of drinking polluted water which is the major cause of stomach aches in many of low income and middle-income economies. As per WHO (World Health Organization) in 2017, 29% of the Global population continue to drink contaminated and unsafe water and as per their prediction by 2025, half of the world's population will be living in water-stressed areas.
