Abstracts

Global Sinusitis treatment Market is valued approximately at USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Sinusitis can be acute or chronic, with bacteria and viruses obstructing or filling the nasal cavities with fluid if untreated. If sinusitis is not treated or diagnosed, it can lead to problems such as brain abscess and meningitis. For diagnostic purposes, blood tests, ciliary function tests, nasal cytology and allergy testing, sinus CT scans, and sinus MRIs are all available. Antibiotics are the initial line of protection, followed by decongestants and, if needed, surgery. The market is driven by increased demand for diagnostic tests and antibiotics and technological advancements in sinusitis surgery. For instance, monoclonal antibodies are an efficient type of precision medicine in sinusitis with polyps, according to Clinic Barcelona 2021, and several clinical trials have been conducted to determine their efficacy using the medicines omalizumab (IgE), mepolizumab (IL-5), reslizumab (IL-5) and dupilumab (IL4). Nasus Medical, a startup developed out of Stanford Biodesign and now a Fogarty Institute company, is developing a solution for improved intra-nasal drug delivery that will be available in May 2020. However, use of generic drugs in global market may impede market growth over the forecast period of 2021-2027.

The Americas are the largest market for acute sinusitis worldwide, with North America leading the way. The market in North America is growing because of the increased incidence of chronic illnesses in the United States and technical improvements in diagnostic testing. Acute sinusitis impacts 29.4 million individuals in the United States,

according to the Centers for Disease Control and Prevention (CDC). In addition, direct spending on sinusitis management by the general public in the United States has increased, including medicines, outpatient and emergency department visits, and ancillary testing and procedures.
