## **Abstracts**

Global Situation Awareness System Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Situation Awareness Systems is a security system used to collect and analyze the surrounding environment to enhance safety and security, environmental monitoring, and mass notification. Rising investment in security and surveillance systems, growing investment in SASs for cybersecurity and increase in cyber-attacks have led to the adoption of Situation Awareness System across the

forecast period. For Instance: As per the HELPSECURITY NET, Over 12 billion records, containing a range of personal identifiable information, were reportedly compromised in 2020, while the number of known ransomware attacks increased by nearly 60%. Also, with the increased focus on military modernization, the adoption & demand for Situation Awareness System is likely to increase the market growth during the forecast period. However, high cost impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Situation Awareness System Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to high demand for space situational awareness activities from prominent organizations like the U.S. Department of Defense and NASA. Whereas, Asia Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as timely detection of problems, surge in concern over public safety, and development of smart infrastructure would create lucrative growth prospects for the Situation Awareness System market across Asia Pacific region.
