Abstracts

Global Skin Rejuvenation Market is valued at approximately USD 5.44 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 11.1 % over the forecast period 2022-2028. In a cosmetic operation called skin rejuvenation, damaged skin cells are removed from the skin's surface using a variety of tools such as lasers, phototherapy, and acids. Various skin conditions, including wrinkles, dark circles, facial lines, pigmentation, scars, stretch marks, acne, dry, itchy skin, and age spots, are treated through skin rejuvenation. There are surgical and non-surgical techniques for skin rejuvenation. The increasing demand for minimally invasive aesthetic procedures and urban residents' evolving way of life have led to the adoption of Skin Rejuvenation across the forecast period. For Instance: as per Statista in 2022, the Skin Treatment segment will generate US\$17.94 billion in revenue. The market is anticipated to expand by 3.78 percent yearly (CAGR 2022-2027). Comparatively, the United States generates the majority of revenue (\$3,605.00m in 2022). In 2022, per-person revenues of \$2.36 are produced based on population statistics. Also, the technical developments made by industry players are likely to increase the market growth during the forecast period. However, limitations of these techniques for face-to-face treatment may hamper the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Skin Rejuvenation market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is

the leading region across the world in terms of market share owing to the increasing demand for minimally invasive aesthetic procedures and urban residents' evolving way of life. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as technical developments made by industry players would create lucrative growth prospects for the Skin Rejuvenation market across Asia-Pacific region.
