Abstracts

Global Skin Tears Treatment Market is valued at approximately USD 433.50 million in 2021 and is anticipated to grow with a healthy growth rate of more than 3.5 % over the forecast period 2022-2028. Skin Tears are wounds that may look like large cuts or scrapes. They're considered acute wounds. This means they occur suddenly and typically heal in an expected fashion over time. The surging number of road accident injuries and increasing geriatric population has led to the adoption of Skin Tears Treatment across the forecast period. For Instance: According to the latest report on the geriatric population, in 2020, around 264 million people are over 60 years of age and around 191 million people are over 65 years of age. Also, with the increasing prevalence of injuries and increase in the number of steps taken by the government to raise awareness, the adoption & demand for Skin Tears Treatment is likely to increase the market growth during the forecast period. However, high cost of skin tear dressing and low awareness about the available treatment preferences for skin tear impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Skin Tears Treatment Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North

America is the leading region across the world in terms of market share owing to the increase in the ageing population, and favorable reimbursement policies. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as growing prevalence of chronic injuries, rising geriatric population would create lucrative growth prospects for the Skin Tears Treatment Market across Asia-Pacific region.

Major market players included in this report are:

Hollister INC
BSN Medical GmbH,
Cardinal Health
Coloplast A/S
Conva tec Group PLC
Covalon Technologies Ltd.
