Abstracts

Global Slow and Controlled Release Pesticides Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Slow and controlled release pesticides are primarily used in the agriculture sector in order to control the level of pests on the crops, these pesticides help in preventing crop fever. Limited fertile land and rapidly increasing population worldwide are factors contributing to the market growth. For instance, according to Statista, the global population is expected to rise to 10.7 billion, by the year 2100 from 7.75 billion in the year 2020.
