Abstracts

Global Small Bore Connectors Market is valued at approximately USD 536.54 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 6.00 % over the forecast period 2022-2028. Small-Bore Connectors are parts used to connect medical equipment that transport fluids and gases to patients, such as tubing, syringes, and other accessories. The term 'Small-Bore' refers to the connector's tiny diameter aperture (less than 8.5 millimetres). The increasing focus on research and development (R&D) activities and rising number of surgical procedures has led to the adoption of Small-Bore Connectors across the forecast period. For Instance: In September 2021, Colder Products Company (CPC), a leading provider of medical connecting devices, announced launching its new range of single-use connectors, MicroCNX™ Series Connectors and According to the Foundation Trust Network, more than 10 million surgical procedures and operations are performed across the U.K. every year. Also, with the growing adoption of liquid bore connectors in patients with dysphagia and increasing prevalence of respiratory disorders, the adoption & demand for Small Bore Connectors is likely to increase the market growth during the forecast period. However, lack of skilled professionals and high cost of products impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Small Bore Connectors Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the

leading region across the world in terms of market share owing to the increasing number of surgical and cosmetics procedures. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as increasingly focusing on introducing new non-standardized products, increasing government investment in the healthcare sector would create lucrative growth prospects for the Small-Bore Connectors Market across Asia-Pacific region.
