Global Smart Building Market is valued approximately at USD XX billion in 2022 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2023-2030. Smart building is a structure that uses advanced technology and integrated systems to enhance its overall functionality, efficiency, and sustainability. The goal of smart buildings is to create environments that are more comfortable, secure and energy-efficient for occupants, while also providing better management and control for building owners and operators. Various technologies and applications contribute to the smart building concept, making them more adaptable and responsive to the needs of both users and the environment. Moreover, the growing emphasis on energy conservation and sustainability, rising adoption of IoT-enabled BMS, growing awareness of space utilization, rising urbanization and population growth that anticipated to create the lucrative demand for the market during forecast period 2023-2030.

Additionally, the global trend of urbanization, coupled with population growth, is leading to increased demand for infrastructure and buildings. Smart building technologies offer solutions for managing urban challenges such as energy consumption, traffic, and

resource utilization. According to The World Bank, in 2020, or approximately 4.38 billion people that are around 55% of the world's population were living in the urban areas. In addition, it is predicted that by 2045, there are around 6 million people living in cities, an increase of 1.5 times annually. As a result, the growing urbanization is anticipated to support the market growth. Moreover, the rise in the smart city trend, and advancement in field of IoT and its growing awareness is anticipated to create the lucrative opportunity for the market. However, the higher installation costs and infrastructure requirements, and user concerns about data privacy stifles market growth throughout the forecast period of 2023-2030.

The key regions considered for the Global Smart Building Market study includes Asia Pacific, North America, Europe, Latin America, and Middle East & Africa. North America dominated the market in 2022 with largest market share owing to the supportive government Initiatives and regulations, growing awareness about environmental sustainability and a desire to reduce energy consumption, businesses and building owners, and widespread adoption of the Internet of Things (IoT) and the availability of high-speed connectivity. Whereas, the Asia Pacific region is expected to grow with the fastest growth rate during the forecast period, owing to factors such as the high level of urbanization and population density, robust economic growth in countries such as China, India, and Southeast Asian nations and growing smart city initiatives.
