Abstracts

Global Smart Dishwasher Market is valued approximately at USD 2.62 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 9.4% over the forecast period 2021-2027. A smart dishwasher is a connected smart home appliance that brings enhanced features to standard dishwasher such as wi-fi connectivity and flexibility options such as voice control. Growing demand for kitchen remodeling, preference for building a modular kitchen and new product launch by market players are boosting the demand in the market. For instance, in April 2020, Miele & Cie. KG launched G6700 dishwasher line, equipped with smart features and an auto-dispensing detergent disk. Similarly, in June 2018, Panasonic Corporation released a line of drawer-type dishwashers with a strong dryer function. The product was a type of bending-free drawer-type smart dishwasher. Furthermore, technological advancements such as wi-fi enablement and mobile alerts are expected to fuel the growth in the market in coming years. However, high repairing costs may hamper the growth during forecast period.

Asia Pacific, North America, Europe, Latin America, and Rest of the World are considered for the regional analysis of the global Smart Dishwasher Market. Europe is a significant region across the world in terms of market share due to growing penetration of smart household coupled with several kitchen and home remodeling projects in the region. Whereas North America is anticipated to exhibit the highest growth rate over the forecast period 2021-2027 due to rising inclination towards convenient and connected home experience.
