Abstracts

Global Smart furniture market is valued at approximately USD 143.6 million in 2020 and is anticipated to grow with a healthy growth rate of more than 12.4% over the forecast period 2021-2027. Smart furniture is defined as networked, designed furniture that is equipped with an intelligent system or controlled by energy sources and user's data. Changing lifestyle of customers and rise in adoption of tech savvy workspace states an increase in the demand for smart furniture market. For Instance: As per the data from smart furniture market is valued at USD 143.6 million in 2020 and is expected to grow by USD 325.48 million by 2027. However, high cyclic demand for furniture impedes the growth of the market over the forecast period of 2021-2027. Also, increased disposable income of consumers is likely to increase the market growth during the forecast period.

The regional analysis of global Smart furniture market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Europe is the leading/significant region across the world in terms of market share owing to the growing geriatric population and promptness & affordability of urgent care services coupled with the well-established healthcare infrastructure. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2021-2027. Factors such as rising disposable income, rising incidences of injuries and improving healthcare infrastructure would create lucrative growth prospects for the Smart furniture market across Asia-Pacific region.
