Abstracts

Global smart home market is valued approximately at USD 76.5 billion in 2020 and is anticipated to grow with a healthy growth rate of about 10.4% over the forecast period 2021-2027. Smart home refers to the type of home which is equipped with heating, lighting, and electronic devices that can be controlled by computer or smartphone, remotely. The main objective of the smart home is to enhance the convenience and quality of life. Other goals include more efficient use of energy and greater security due to remote-controllable, connected devices. A range of home appliances, such as the lights, washing machine, coffee maker, and others can be time-controlled. The global smart home market is being driven by growing number of internet users and increasing adoption of smart devices and rapid proliferation of smart gadgets and smartphones. Furthermore, use of lighting controllers with in-built data-connectivity technology will provide new opportunities for the global smart home industry. Also, market players across the globe are strengthening their geographical presence through undertaking various strategic initiatives, which is also expected to have a positive impact on the market growth. For instance, in 2019, Apple, Amazon, Google, and Zigbee Alliance entered a collaboration to develop a new working group with the intent to manufacture and promote the adoption of a royalty-free, new, connectivity standard for enhancing the compatibility among Smart home products, with security as a prime design tenet. Also, in 2018, Johnson Controls International acquired Lux Products Corporation, which is a major provider of smart products and residential thermostats. Lux Products

Corporation markets a range of successful commercial and residential product lines such as timers, smart home thermostats, including Geo and Kono. Such strategic moves by the market players are expected to fuel developments in smart home which is likely to boost the market growth. However, issues related to breach in privacy and security may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global smart home market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World.
