Abstracts

Global Smart Home Security Camera Market is valued at approximately USD 6.1 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 18.86% over the forecast period 2022-2028. A smart home security camera is a form of camera that is integrated with the Wi-Fi connections that enables a homeowner to monitor and control the camera's functions and videos remotely by connecting it via a smartphone app. This camera uploads the footage to Cloud storage and evades the need for a potentially complicated on-site storage setup. The growing demand for smart homes in the market, rapid technological advancements, coupled with the rising number of burglaries, theft, and robberies are some primary factors bolstering the market demand across the globe. For instance, in June 2020, Arlo Technologies, Inc. declared the introduction of the Ultra Series of security cameras, the Ultra 2 Wire-Free Spotlight Camera System. The product delivers a better user experience, creating advanced features such as an ultra-wide 180-degree field of view, 4K video with HDR, and others. Consequentially, the rising number of technological developments is stimulating the demand for the Smart Home Security Camera, which is accelerating the market growth. However, rising installation costs impede the growth of the market over the forecast period of 2022-2028. Also, increasing disposable income and various strategic initiatives taken by the private players across the global market are anticipated to act as catalyzing factors for the market demand during the forecast period.

The key regions considered for the global Smart Home Security Camera Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region with a market share of 1.9 billion in the global

market owing to the introduction of new products in the market and growing penetration of smart home devices. Whereas, Asia-Pacific is anticipated to exhibit the highest CAGR of 21.99% over the forecast period 2022-2028. Factors such as the growing residential construction activities, as well as surging demand for home security devices such as cameras, would create lucrative growth prospects for the Smart Home Security Camera Market across the Asia-Pacific region.
