## **Abstracts**

Global Smart Weapons Market is valued approximately at USD 13.84 billion in 2019 and is anticipated to grow with a healthy growth rate of more than 6.3% over the forecast period 2020-2027. Smart Weapons are weapons which have some degree of autonomous guidance or 'intelligence' to enable them to acquire and attack targets with the minimum of external support. Rising armed conflicts, terrorism, cross-border disputes has driven the military use of smart weapons. Also, the growing demand for powerful striking power and efficient defense system has led to increase in its part of the government budgets which contribute to the growing demand of Smart Weapons Market. For instance: according to the SIPRO report on "Trends in World Military Expenditure, 2019, India's military expenditure increased b 37% in the the period 2019-20 due to rising border tensions with China and Pakistan. Further, growing investment in defense, increasing technology efficiency, increasing investment on the research and development and growing demand for Internet-of-Things (IoT), all these drivers has led the adoption of Smart Weapons across the forecast period. For Instance: according to mpda company website, in September 2019, the defense authorities of France, Cyprus, and Belgium initiated trials of anti-tank missiles However, high manufacturing costs and less share of defense budgets of developing countries as these countries are unable to contribute less share of their national income to the defense sector rather they focus more on education & health as compared to the developed countries which have abundant of resources and can focus on every sector, hence this can impede the growth of the market over the forecast period of 2020-2027. Also, Opportunity with the increasing production volume, the adoption & demand for

Smart Weapons is likely to increase.

The regional analysis of global Smart Weapons Market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading/significant region across the world in terms of market share owing to the growing share of defense in government budgets and well-established defense infrastructure. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027.
