## **Abstracts**

Global social media analytics market is valued approximately at USD 2.6 billion in 2020 and is anticipated to grow with a healthy growth rate of about 24.0% over the forecast period 2021-2027. Social media analytics is the ability to collect and find meaning in data which is collected from social channels in order to support business decisions. It is also used to analyze online media channels which includes blogs, news websites, and forums. The global social media analytics market is being driven by rising number of social media users and increased focus on the market and competitive intelligence.

Furthermore, rising cloud adoption trends will provide new opportunities for the global social media analytics industry. According to Statista, the total number of social network users across the globe is expected to increase from 2.86 billion in 2017 to approximately 4.41 billion by 2025. Such growth in the penetration of social media across the globe is expected to increase the demand and adoption of social media analytics solutions and services for data analysis. Hence, this is expected to promote the market growth. However, complexities in the analytical workflow may impede market growth over the forecast period of 2021-2027.

The regional analysis of the global social media analytics market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America accounts for the largest share in terms of market revenue in the global social media analytics market over the forecast period 2021-2027. Factors such as early and rapid adoption of new and advanced technologies, presence of majority of the key market players, technological advancements and developments, etc. contribute towards the largest market share of the region in the forecast years.

Major market player included in this report are:

IBM

Google

Oracle

Salesforce

Adobe

SAS

Clarabridge

NetbaseQuid

Digimind
