Abstracts

Global Sodium Chlorite Market is valued approximately USD XX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2021-2027. Sodium chlorite is an inorganic chemical compound widely used in the paper manufacturing and as a disinfectant. The global Sodium Chlorite market is driven by increasing paper production as sodium chlorite used in manufacturing process. For instance, according to Statista, growth has been witnessed in the packaging paper and paperboard production in China from 62.8 million metric tons in 2018 to 65.2 million metric tons in 2019, largest among the other Asian countries. The market growth is also to be driven by rising adoption of disinfectants due to growing infectious diseases. However, availability of the alternative substitutes such as hydrogen peroxide and ozone, and stringent regulations regarding the use of sodium chlorite hampers the growth of the market over the forecast period of 2021-2027. Furthermore, enhancing food packaging industry, rising demand for antimicrobial agents in the food processing industry, new product launches and expanding end uses are expected to create opportunity for Sodium Chlorite market growth over the forecast period.

The geographical analysis of the global Sodium Chlorite market is studied for major regions such as Asia Pacific, North America, Europe, Latin America, and the Rest of the World. Asia-Pacific is the dominating region across the world in terms of market share owing to high consumption levels of sodium chlorite for water treatment and developing paper manufacturing industry. Whereas Europe is anticipated to exhibit the highest

growth rate over the forecast period 2021-2027 due to high consumption of disinfectants, high use in healthcare, and increase in investments by the private companies in various manufacturing industries which support the market growth in the region.
