Abstracts

Global Sodium Dichloroisocyanurate Market is valued at approximately XX in 2021 and is anticipated to grow with a healthy growth rate of more than xx% over the forecast period 2022-2028. In water treatment applications such as drinking water disinfection, swimming pool disinfection, and household point-of-use water, sodium dichloroisocyanurate is widely used as an agent for environmental sterilisation and disinfection. In the coming years, rising demand for chlorinating agents in the water treatment industry is expected to drive sales of sodium dichloroisocyanurate in the global market. It reduces individual diarrhoea rates and improves microbiological drinking water quality, according to a study published in 'The American Journal of Tropical Medicine and Hygiene,' which is a major factor driving Sodium Dichloroisocyanurate sales. Sodium dichloroisocyanurate is also used in biocide for veterinary hygiene, food and animal feed, and slime control, among other applications. In the coming years, rising demand for sodium dichloroisocyanurate in biocides is expected to drive market growth. Sodium dichloroisocyanurate sales for various applications in leather treatment products, textile treatment, adhesives and sealants, and coatings are expected to contribute to market growth during the forecast period, among other applications. For instance, ITC has launched a new zero-contact Savlon Surface Disinfectant Spray in April 2020. The product was developed in response to the current COVID-19 situation, in which surface disinfection has become critical. The

product promises to kill 99.99% of germs. The introduction of such novel disinfecting products would pave the way for new applications for the component. Strict toxicity regulations and standards, such as the presence of any residue in it, could cause sodium dichloroisocyanurate to be rapidly converted to cyanuric acid when it comes into contact with saliva, which could stymie sales.

The key regions considered for the global Sodium Dichloroisocyanurate market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. Geographically, Asia Pacific is expected to hold a dominant position in the market demand for sodium dichloroisocyanurate, with a significant growth rate projected over the forecast period.
