Abstracts

The Global Sodium Sulphate Market was valued at approximately USD 0.73 billion in 2023 and is expected to grow at a CAGR of 4% from 2024 to 2032. Sodium sulphate (Na_2SO_4) is widely used across multiple industries, including detergents, textiles, paper & pulp, and glass. A significant driver for market growth is the rising demand for sodium sulphate in the detergent industry, where it serves as a cost-effective filler in powdered detergent formulations. This demand is further propelled by urbanization, increasing population, and heightened focus on hygiene and cleanliness.

Additionally, the textile industry is a major consumer of sodium sulphate, utilizing it in dyeing and printing processes. As global demand for textiles grows, particularly in emerging markets, the need for sodium sulphate is projected to increase. However, the market faces challenges from the availability of cheaper substitutes that offer similar properties, which may restrain growth. Nevertheless, growing environmental awareness presents an opportunity for sodium sulphate to be positioned as an eco-friendly alternative in several applications, such as detergents and textiles, potentially driving market expansion.

The key regions considered in the study include Asia Pacific, North America, Europe, Latin America, and the Middle East and Africa. the Asia-Pacific region held the largest market share in 2023 and is anticipated to grow at the highest CAGR during the forecast period. The region's rapid industrialization, particularly in China and India, is fueling demand across sectors such as detergents, textiles, and chemicals. North

America and Europe also hold significant shares due to their advanced industrial infrastructures and growing demand for sustainable products.
