## **Abstracts**

Global Soft Magnetic Materials Market is valued at approximately USD 20.79 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 4.35% over the forecast period 2022-2029. Soft magnetic materials are often used in automotive electric motors due to benefits including low noise, compact design, and energy savings. Soft magnetic materials are also often used in stators for Stepper motors, brushed and brushless DC motors, switch reluctance motors, claw pole motors, transformers, and alternators are examples of electric motors. . These materials function as electrical insulators and endure lower eddy current losses because of their low coercivity, strong electrical resistance to iron, high permeability, and soft magnetic properties. The Soft Magnetic Materials Market is expanding because of factors such as increasing adoption and demand of electric vehicles and innovations in the development of harvesting renewable energy.

Innovations in the production of renewable energy, expanding investments in the domain of power distribution, and rising interest in electric vehicles are all contributing to the market's expansion. For instance, the European Investment Bank decided to allocate USD 1.64 billion to energy efficiency and renewable energy projects around the world in 2019. Furthermore, increasing financial support to produce electric vehicles is further boosting the market growth. For instance, the American president signed an executive order in August 2021 calling for all new cars to be 50% electric by 2030. As a result, numerous automakers are turning their attention to the creation of EVs. For instance, Bentley Motors declared in October 2021 that all its vehicles would likely be

electric by 2030 and plug-in hybrids by 2026. In addition, rising investments in the power distribution sector and increasing demand for motors in various applications is creating lucrative growth in the market. However, the high cost of soft magnetic materials may halt market growth.

The key regions considered for the Global Soft Magnetic Materials Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to rising demand and adoption of electric vehicles and rising demand from various applications along with the presence of key market players in the region. Whereas Europe is expected to grow with the highest CAGR during the forecast period, owing to factors such as the rising automotive industry in the region, rising government support to the industry and rising product innovation and research and development activities in the region.
