Abstracts

Global Solid Sulphur Market is valued at approximately USD 3.4 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 3.00 % over the forecast period 2022-2028. Solid Sulphur is a tasteless, odorless, brittle solid that is pale yellow in color, a poor conductor of electricity, and insoluble in water. It is cast into convenient cylindrical sizes, its uses include chemical manufacturing, burnt for curing, fumigating, and preserving or bleaching effects. The high demand for sulphur in the agriculture sector for fertilizers, sustainable demand for sulphuric acid in the oil industry has led to the adoption of Solid Sulphur across the forecast period. For Instance: as per the Journal of Urgent Care Medicine in 2017, the Hospital Corporation of America has announced a plan for the expansion of Solid Sulphur in an effort to build patient access points in its 14 major markets. Also, the Corporation used a portion of its effort, \$2.9 billion capital budget in 2017 to increase urgent care locations from 72 to 120 by the year-end. Also, with the rise in demand for chemical processing of rubber, the adoption & demand for Solid Sulphur is likely to increase the market growth during the forecast period. However, high cost of extraction of Sulphur impedes the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Solid Sulphur Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the presence of the fertilizer industry. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as growing demand from

fertilizers and chemical processing applications would create lucrative growth prospects for the Solid Sulphur Market across Asia-Pacific region.
