## **Abstracts**

Global Soybean Protein Fiber Market is valued approximately at USD XX billion in 2019 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2020-2027. Soya protein fibers (SPF) are produced in combination with synthetic polymer (polyvinyl alcohol) as a predominant component from regenerated soya proteins Glycine Max. Textiles from SPF can be labeled as soybean azlons, according to textile fiber labelling (FTC, 2010). Soybean Protein Fiber is a unique Active Fiber. Its 16 amino acids are healthy and nutritional to people's skin. Its moisture absorption, ventilation, draping and heat cover the superior performances of natural fibers and synthetic ones. SPF has softness and smoothness of cashmere but it does not cause hazard to the environment. Increasing the adoption of natural resources are the factors that are driving the market. According to Kanitkar, World fiber production is increasing every year and 78 million tons of fibers were produced worldwide in 2010, which also includes about one million tons of wool and 0.15 million tons of silk. Soybean Protein Fiber has not only the superiorities of the natural fibers but also the physical properties of synthetic ones. Soybean protein fiber meets the people's demand of comfortable and beautiful wearing and also conforms to the trend of easy care. According to Shanghai, about 1,500 tons of fibers are produced annually by Shanghai Winshow Soybean Fibre Industry Co., Ltd under the brand name Winshow. Four provinces in China have established six manufacturing bases to produce SPF. Clean environment friendly production processes is the opportunity factor in this market.

The regional analysis of global Soybean Protein Fiber market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the

World. China has taken the lead in industrialized soybean protein fiber production worldwide. With 46 per cent of the world market, the United States of America has become the world leader in Soybean production. Other highly produced soybean countries are Brazil (20%), Argentina (14%) and China (9%).
