Abstracts

Global Specialty Injectable Generics Market is valued at approximately USD XXX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Specialty Injectable Generics are drug therapies used for the treatment of chronic conditions that need injection, infusion, or inhalation and are sold as generics.. It includes biologics used in the treatment of a variety of drugs and has the same active ingredients as branded versions, although the inactive contents of the medications can vary. Specialty Injectable Generics are less expensive as compared to traditional drugs and growing number of patents set to expire have led to the adoption of Specialty Injectable Generics across the forecast period. For Instance: as per Statista in 2021, the global specialty generics market was valued at roughly 45 billion dollars in 2018, and it is predicted to grow to nearly 90 billion dollars by 2024. Due to patent expiration, the industry is anticipated to lose 19 billion dollars in prescription medicine sales worldwide by 2022. Following the expiration of a patent, other businesses are permitted to produce less expensive generic versions of the original branded drug. Also, as the key market participants are launching new products and illness prevalence is on the rise are likely to increase the market growth during the forecast period. However, manufacturing biologics and generic injectable is an expensive and difficult operation that may impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Specialty Injectable Generics Market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North

America is the leading region across the world in terms of market share owing to the growing number of patents set to expire. Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as key market participants launching new products and rising illness prevalence would create lucrative growth prospects for the Specialty Injectable Generics Market across Asia-Pacific region.
