## **Abstracts**

Global Specialty Medical Chairs Market is valued at approximately USD 3.92 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 8 % over the forecast period 2022-2028. Specialty medical chairs are pieces of medical equipment that aid patients in gaining more flexibility or convenience as a result of various surgical operations. These chairs are designed to provide comfort to patients throughout the treatment process as well as to aid healthcare workers and physicians in completing the procedure or any other treatment. The market is driven by the increasing geriatric population and as the women's gynecologic diseases are becoming more prevalent have led to the adoption of Specialty Medical Chairs across the forecast period. For Instance: as per Statista in 2022, the global dental chair market generated 1.8 billion dollars in sales in 2019 and is predicted to reach over 2.8 billion dollars by 2030. In India, the aged as a percentage of the total population has risen steadily. According to the 1961 census, old women made up over 6% of the total female population. However, by 2031, this figure is expected to rise to 14%. Also, the technological advancements in veterinary healthcare and the rising prevalence of lifestyle-related illnesses are likely to increase the market growth during the forecast period. However, emerging countries have limited access to systems which may impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the Global Specialty Medical Chairs market study include Asia Pacific, North America, Europe, Latin America and Rest of the World. North America is the leading region across the world in terms of market share owing to the growing geriatric population and the prevalence of women's gynecologic diseases.

Whereas, Asia-Pacific is also anticipated to exhibit the highest growth rate over the forecast period 2022-2028. Factors such as technological advancements in veterinary healthcare and the prevalence of lifestyle-related illnesses would create lucrative growth prospects for the Specialty Medical Chairs market across Asia-Pacific region.
