Global Specimen Retrieval Nets Market is valued at approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. The Specimen Retrieval Nets are used for specimen extraction, It is used for removal of the specimen and hence minimize exposure of the specimen and its contents to the incision and abdominopelvic cavity. It has major advantages in hospitals, ambulatory surgical centers, clinics etc. The increasing surgical procedures enhance the market demand in the forecast period at an alarming rate. For instance: according to the World Bank in 2018, the number of surgical operations is growing rapidly. It includes Albania with more than 1900 surgical operations, Andora with more than 5,178, Armenia with around 4,198, and Australia with more than 10,156 during 2018. Additionally, according to Statista in 2021, around 1.84 million surgical operations were registered in hospitals with 25 to 49 beds in 2019. With the rising prevalence of chronic disorders, the number of surgical operations is also rising which propels the market growth. Rising adoption of minimally invasive procedures is another major factor boosting the market growth in the coming years. Whereas, growing demand and adoption by end-users and increasing R&D activities create lucrative opportunities for the Global Specimen Retrieval Market. However, threat of substitutes impedes the market growth over the forecast period of 2022-2028.

The key regions considered for the global Specimen Retrieval Nets market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America is considered to dominate the market in the forecast period owing to the factors such as rising adoption by end-users and increasing penetration of key players.
