Abstracts

Global Spelt Wheat Market is valued approximately USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2022-2029. Spelt Wheat also known as dinkel wheat or hulled wheat is an ancient cereal grain native to southern Europe. Spelt wheat is considered healthier than other conventional wheat species. Spelt Wheat are considered good source of essential amino acids, vitamins, and minerals such as iron, manganese, and zinc among others. The increasing consumption of bread & cereals products and growing demand from brewery industry as well as nutritional benefits associated with Spelt wheat are key factors accelerating the market growth.

The increasing consumption of bread & cereals products is contributing to the growth of the Global Spelt Wheat Market. For instance, according to Statista – as of 2022, revenue in the Bread & Bakery Products segment worldwide is estimated at USD 1,085 billion, and the market is projected to grow annually by 7.70% (CAGR 2022-2027) to reach to USD 1572.20 billion by end of 2027. In addition, in 2022 globally most revenue is generated in China (USD 231.90 billion), and average volume per person in the Bread & Bakery Products segment is expected to amount to 142.7kg. Also, rising investment in food processing industry and growing number of health-conscious individuals would create lucrative growth prospectus for the market over the forecast period. However, the supply demand gap arising due to shortage of Spelt Wheat stifles the market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Spelt Wheat Market study includes Asia

Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the market in terms of revenue, owing to the presence of leading market players operating in the Spelt Wheat space and the region being the origin and highest producer of Spelt Wheat. Whereas North America is expected to grow with a highest CAGR during the forecast period, owing to factors such as rising consumption of cereal based bread and bakery products coupled with increasing popularity of plant based food & beverage products in the region.
