Global Splash Shield Market is valued approximately USD XX million in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2028. Splash Shields also known as skid plate, and lower engine covers are protective covers used for protection of engine and other related parts from road debris such as rocks, leaves, and twigs among others. Splash shields are made from higher density polyethylene or polyurethane based materials. These shields are also made with metal such as aluminium. Growing automobile sector and growing awareness towards vehicle safety as well as increasing ownership of personal vehicles are driving the Splash Shield Market. For instance, according to Statista – In 2020, worldwide electric car sales were estimated at 3 million units, witnessing an increase of 40% from 2019. Furthermore, in 2021 the electric car sales doubled, and reached to 6.6 million units. Moreover, in May 2020, Kansas, United States based Hopkins Manufacturing Corporation with its subsidiary company Hopkins Canada, Inc. acquired the automotive splash guard product lines from Toronto, California, US based NuVue Products Inc. Under this acquisition, Hopkins acquired brands such as RoadSport, Big Mudder, ProFit, BadgeZ, RoadGuard and Defender Tow Guard. Apart from brand name the company also acquired inventory, patents and intellectual property for the splash

guard and mud flap lines. Also, favorable government regulations pertaining to Vehicle Safety and rising advancements in automotive sector are anticipated to act as a catalyzing factor for the market demand during the forecast period. However, high cost associated with splash shield and rising concern over plastic use impede the growth of the market over the forecast period of 2022-2028.

The key regions considered for the global Splash Shield Market study include Asia Pacific, North America, Europe, Latin America, and the Rest of the World. North America is the leading region across the world in terms of market share owing to presence of leading automobile players and growing number of advancements in automotive sector in the region.
