Global Stackable Beaker Market is valued approximately USD XXX billion in 2020 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2021-2027. Stackable beakers are suitable to be used in laboratory for various chemical experiments and are employed in many sectors including health & medical, industrial labs, science labs and education laboratories for various development and innovation. Also, these beakers are not made from glass which make them more durable. The key factor driving the growth of the market is increasing investments in research and development activity which is creating demand for scientific laboratory equipment including stackable beakers. UK Research and Innovation (UKRI) is invested ?213 million in 2020 to expand and upgrade existing research infrastructure of UK. With the growth of industrial sector globally, uses of these beakers in industrial sector is increasing, thus driving the market growth. Another factor is its attributes such as high durability, high temperature operability, chemical resistance and its design which ensures efficient use. However, environmental law regarding the type of raw material used impedes the growth of the market over the forecast period of 2021-2027. Also, growing educational institutions are likely to increase the market growth during the forecast period.
