Global Static Workstation Market is valued approximately at USD XX million in 2019 and is anticipated to grow with a compounded annual growth rate of more than XX% over the forecast period 2020-2027.

Static workstation is defined as the work area which limits the electrostatic discharge and voltage with specified materials and equipment such as common ground cord, tablemat, floor mat, constant monitor, etc. This enhances the working environment whereas prevents damage to the sensitive electronic components. Rapid growth in the automotive sector and rise in industrialization are the major driving factors for the market growth. Further, the increase in demand for mobility as well as connectivity in customer electronics and testing services will accelerate the demand for Global Static Station Market. For Instance: As per IBIS World in 2018, the automotive sector has experienced a growth of 2.7% over past 5 years. Automobile sectors are looking for installation of safety systems to enhance the productivity considering the safety of the working staff.

Moreover, technological advancements in equipment and rise in the investment for research and development (R&D) activities create new opportunities for the market growth. Tremendous rise has been observed in the usage of electronic gadgets over the years which include mobile phones, electric vehicles, industrial machines, etc. For Instance: EV (Electric Vehicle) sales grew to more than two million units globally in 2018: an increase of 63 percent on a year-on-year basis, and a rate slightly higher than in previous years. This leads to enhancement in production activities considering the safety measures and motivating the market growth.

However, higher installation cost is the major restraining factor which impedes the

growth of the market over the forecast period of 2020-2027.

The regional analysis of global Static Workstation market is considered for the key regions such as Asia Pacific, North America, Europe, Latin America and Rest of the World. Asia Pacific is the leading/significant region across the world due to increasing industrialization. Whereas, Asia-Pacific is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2020-2027. Factors such as rise in usage of electronic gadgets and enhance safety measures in industries would create lucrative growth prospects for the Static Workstation market across Asia-Pacific region.
