Abstracts

Global Stock Market Software Market is valued at approximately USD 3.47 billion in 2021 and is anticipated to grow with a healthy growth rate of more than 12.8% over the forecast period 2022-2029. Stock Market Software is a set of computer programs that facilitates the automated trading and analysis of financial products, such as stocks, options, and futures. Stock market Software covers different aspects of stock market investment such as fundamental & technical analysis of stock as well as transaction processing. The Stock Market Software market is expanding because of factors such as rising adoption of cloud-based applications and increasing utilization of AI technology in trading analysis as well as strategic initiatives from leading market players.

According to Statista - in 2021, the global cloud applications market was valued at USD 133.6 billion, and the market is projected to grow to USD 168.6 billion U.S. dollars by 2025. Moreover, favorable initiatives from leading market players is another factor driving the market growth. For instance, in May 2022, The Stock Exchange of Mauritius (SEM) launched a new automated trading system. Through this new platform, investors would be able to trade in different assets through web browsers and a mobile application called mySEM. Also, rising emergence of Algorithmic trading organizations and increasing penetration of Machine learning technology would create lucrative growth opportunities for the growth of the market over the forecast period. However, high deployment costs associated with Stock market Software and concerns relating to cyber security impede market growth throughout the forecast period of 2022-2029.

The key regions considered for the Global Stock Market Software Market study include Asia Pacific, North America, Europe, Latin America, and Rest of the World. North America dominated the space in terms of market share owing to increasing adoption of stock software market as well as presence of leading market players in the region. Whereas, Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as increasing number of stock market investors as well as rising emergence of online trading platforms in the region.

Major market players included in this report are:

Accenture

Cognizant

Google, LLC

IBM Corporation

Infosys Limited

Intel Corporation

Lightspeed Financial Services Group LLC.

MetaQuotes Ltd

Microsoft Corporation

Oracle Corporation

Recent Developments in the Market:

New Product Launch: In September 2021, Malaysia based Shareschart launched online proprietary stock analysis software for day trading, swing trading, long term, and value investing.
