Abstracts

Global Street and Roadway Lighting Market is valued approximately at USD XX billion in 2021 and is anticipated to grow with a healthy growth rate of more than XX % over the forecast period 2022-2029. Street and Roadway Lighting plays an important role in the security and safety of the public places. It includes LEDs, Fluorescent Lamps, and High-intensity Discharge Lamps. The Street and Roadway Lighting market is expanding because of factors such as the rising demand of smart city infrastructure and growing demand for intelligent solution in street light systems.

According to China Government Smart City Project in 2019, From 2016 to 2021, China intends to encourage the development of 100 new smart cities to lead the country's urban planning and development. Over 1,000 smart city pilot projects are ready for and under construction around the world, with China hosting approximately 500 of them, covering both small and large cities. Also according to the Verdict , UK in the spending on global smart cities is projected to grow from USD 221 billion to USD 442 billion during 2019-2025. Whereas, rising demand and growing R&D activities by market players are creating lucrative opportunities for the market expansion. However, the

higher installation cost of Street and Roadway Lighting equipment hampers the market growth in the forecast period.

The key regions considered for the Global Street and Roadway Lighting Market study includes Asia Pacific, North America, Europe, Latin America, and Rest of the World. Asia Pacific dominates the space in terms of revenue, owing to the rising demand for smart city infrastructure, cohesive government initiatives and investment in smart lighting, and awareness of energy saving program. Asia Pacific is expected to grow significantly during the forecast period, owing to factors such as the rising penetration of market players and R&D activities

Major market player included in this report are:
