Global Student Information System Market is valued approximately at USD 7.92 billion in 2020 and is anticipated to grow with a healthy growth rate of more than 16.4% over the forecast period 2021-2027. Student Information system is a software platform solution which is designed to help schools and colleges in tracking and managing all the student data including everything from grades, attendance, and various information. The global Student Information System market is being driven by growing high demand for online education and adoption of e-learning technology. Furthermore, rise in governments initiatives for upgrading education infrastructure, will provide new opportunities for the global Student Information System industry. For instance, according to statista, in year 2019, the online e-learning market across the world was sized to around USD 101 billion dollars. During the same time, the learning management system market had generated the revenue of USD 18 billion and it is anticipated that by year 2026, the total market value for e-learning globally will grow exponentially, reaching around USD 370 billion. As a result, increased in online and e-education market will necessitate the use of student information system, which will serve as a catalyst for the Student Information System industry in the future. However, high cost associated with the system, may impede market growth over the forecast period of 2021-2027.
